

# ARTOME X20

Artome X20 transforms large spaces for events and experiences with highly versatile laser projector and embedded sound system. It is movable and installation free solution that you can easily operate with your laptop through HDMI. Artome X20 brings ease of use to audiovisual technology with plug and play features.

**Double the experience**

## Enabling scalable technology

Artome X20 is a scalable audiovisual solution for extensive experiences. The built-in sound system uses Artome's own technology, which guarantees that the Epson projector and embedded sound system to work seamlessly together and enables the usage with different operating systems without needing any additional installation of drivers or software.

## Double the experience

Artome X20 allows easy remote and live communication with Teams, Zoom or any other videoconferencing platform.

## **Installation-free solution for large spaces**

Artome X20 brings the audiovisual technology to any space on wheels. It is an adaptable solution that provides image and sound easily and it helps to save time and money in construction because it doesn't need fixed installation.

## **Transforms any space to experiences**

Artome X20 is a movable all-in-one solution that combines a projector with large-scale display and easy-to-use sound system. You can operate it with your laptop through HDMI and transform a gymnasium into an event venue or a lobby into a stage instantly to bring extensive experience to any space.

## **High brightness for professional use**

The light output of 7000-10000 lumens produced by the Epson laser projector meets the needs of the most challenging and bright spaces. With optional interchangeable lenses Artome X20 is compatible with any kind of projection environments.
