

SMART Board® MX series

Hubs of interactivity

Digital whiteboard. Chromium™ web browser. Easy screen sharing. SMART Board MX series has all the essentials educators need to bring the devices students love into any learning environment. MX series offers great value for schools that need an interactive display on a tight budget.

One-year  SMART Learning Suite subscription included.

Exclusive iQ technology

Available in 65", 75" and 86" sizes

iQ is an all-in-one technology exclusive to SMART Board displays

The SMART Board's built-in iQ technology puts everything you need in one place, available at the touch of a finger. There's no need for wires and cables. The embedded computer offers one-touch access to the robust SMART Learning Suite applications for interactive lessons, game-based activities and online co-creation. There's also access to collaboration tools, like the built-in web browser and wireless screen sharing.

Features

SMART Learning Suite

Combines lesson delivery, assessment, student collaboration and game-based activities into one ultimate education suite. It connects students, teachers and devices to turn lessons into enriching learning experiences.

Screen sharing

Share everything from any Android® (Google Cast), iOS® (AirPlay) and Windows® (Miracast) device wirelessly – without plugging in hardware or installing apps.

Web browser

Explore websites and YouTube videos right at the board with the integrated Chromium web browser.

Digital whiteboard

Pick up either of the two pens from the magnetic tray and start writing on the panoramic whiteboard. Share everything you write as you go with up to 250 devices located anywhere – students can write back too. When you're done, easily save notes to the display and send them to students as PDF files.

Flexible connectivity

Connect computers and storage media through the display's numerous HDMI, VGA, USB and multimedia ports. Front facing convenience ports also provide easy access to essential ports.

Object awareness™ knows fingers select, pens write and palms erase without selecting tools from a menu.

SMART ink™ lets you write over websites, videos, PDFs and Microsoft Office® files, and save your notes into almost any file type.

Silktouch™ frictionless finish ensures a smooth, comfortable touch experience and eliminates finger burn, even after hours of use.

Ambient light sensor

Automatically dims or brightens the display, ensuring comfortable viewing in any lighting conditions.

10 simultaneous touch points for Windows, means multiple students can use gestures, like zoom, rotate and flip – at the same time.

Commercial grade

MX series is rated for 50,000 hours of reliable use. SMART's Accelerated Life Testing ensures less downtime and longer life.

SMART Board displays have received many safety, regulatory and environmental certifications, giving you peace of mind that the MX series adheres to government or other regulatory requirements.
