Software Version 3.4.0 for Lifesize® Icon™ Video Systems

This release includes several enhancements for Lifesize Icon conference room systems. Moderator controls have been improved so that moderators can end the call for anyone, and participants can only end the call for themselves. On Lifesize Phone HD and Phone, 2nd Generation, you can now easily see if a system is in Do Not Disturb mode. And we've added two new languages, Czech and Dutch. This release includes important fixes for stability and performance and resolves several bugs. Lifesize recommends that all Lifesize Icon video systems customers upgrade to this release immediately. Learn more.

NOTE: This release is NOT for the Lifesize® Icon Flex™ video solution.
