

StarLeaf

The StarLeaf User Interface

With StarLeaf, video calling and conferencing is so simple that anyone can use it without training or instruction. We offer a consistent user interface, which is central to the entire range of hardware and software endpoints. For hardware endpoints choose between the StarLeaf Phone and the StarLeaf Touch. Either can be paired with our room and desktop systems to offer the same feature rich functionality. The same experience, and functionality is offered by StarLeaf Breeze, our software endpoint.

Intuitive and easy

For the user StarLeaf represents a breakthrough in simplicity and design excellence. With step-by-step visual cues, users are guided through a wealth of calling and conferencing functionality.

One touch conferencing

Throughout our range, the StarLeaf user interface provides one-touch conferencing, for video and voice, which makes going from a two-person call, straight into a group meeting super-easy. In a group call, the conference lead retains control with the ability to mute participants, and connect and disconnect parties as the need arises. When the lead exits the call, discussion continues, with the lead passed on to the next person.

Meet anyone, anywhere, anytime

Managed from the cloud, the StarLeaf user interface offers universal connectivity so that you can hold or join meetings easily. It enables secure calling to any StarLeaf room or personal telepresence system, as well as the ability to call any standards-based video conferencing system, be it hardware or software.

And with the Guest Invite feature you can ask anyone to join you on a video call or conference, for free, directly from their PC, Mac or iPad, enabling you to meet anyone outside of your organization, anywhere in the world.

FEATURES

- ▶ Choice of StarLeaf Phone or StarLeaf Touch
- ▶ **StarLeaf Phone only:**
 - ▶ Headset support
 - ▶ Privacy handset
- ▶ **StarLeaf Phone and Touch:**
 - ▶ One experience across all StarLeaf hardware and software
 - ▶ Large backlit touch screen

 - ▶ 14 direct dial favorites display on-screen presence status
 - ▶ Call history and last number redial
 - ▶ Volume control
 - ▶ Mute and speakerphone buttons
 - ▶ Full duplex speakerphone
 - ▶ Wideband audio
 - ▶ 2 port Gigabit Ethernet

Instant access to corporate directories, personal contacts and favorites

Simply access the corporate directory, your contacts and personal favorites all in one touch. Find anyone by scrolling or searching the directory. And you can make your favorites into direct dial buttons that also display their presence status.

StarLeaf visual mail for voice and video messages

The StarLeaf user interface has the unique ability to play back video messages, which can be left for you by any caller. If you've forwarded your calls, opted for 'do not disturb' or were away from your desk, it lets you know messages are waiting. Direct on-screen access to video mail allows you to scroll through all messages, see who's called, listen to, or view any voice or video message—in any order.

Versatile – rooms and desktops

All StarLeaf devices plug straight into the StarLeaf Phone or StarLeaf Touch to become complete desktop or room telepresence solutions. Without further configuration you meet face-to-face, join meetings, share your PC screen with colleagues, partners and customers no matter what video conferencing systems are in play.

Easy deployment anywhere in the world

Deployment of StarLeaf telepresence is a true plug and play experience. Managed from the cloud by StarLeaf Call, you simply plug your StarLeaf into your network, and enter a 12-digit QuickConnect code, which verifies your account, automatically configures the endpoint, populates the corporate directory and allows you to be up and running in minutes.

Economical to buy and use

StarLeaf hardware endpoints have an upfront cost, and a dedicated service access fee. The endpoint is always-on and ready to make and receive calls 24x7. In addition, StarLeaf offers concurrent usage licenses, which can be purchased to increase the conferencing capacity of any StarLeaf deployment.

TECHNICAL SPECIFICATIONS

StarLeaf Phone Physical

Weight 3.4lbs/1550g
Dimensions: (H x W X D) 7.4" x 10.8" x 7.6"/190mm x 275mm x 195mm

StarLeaf Touch Physical

Weight 2.9lbs/1320g
Dimensions: (H x W X D) 7.4" x 8.1" x 7.6"/190mm x 205mm x 195mm

Power

Built-in autosensing IEEE802.3af Class 0 power over Ethernet
DC input for optional AC adapter

Display

7" 800 x 480 LED backlit LCD
Capacitive touch screen

Headset/handset StarLeaf Phone only

4P4C headset connector
Wideband handset

Full duplex speakerphone

Feature keys

- 21 Context sensitive soft keys
 - ▶ Including 14 speed dials
- 19 Dedicated hard keys
 - ▶ Full dial pad
 - ▶ Illuminated speaker phone
 - ▶ Illuminated mute key
 - ▶ Illuminated video mute key
 - ▶ Volume keys
 - ▶ Illuminated headset key
 - ▶ Home key for easy navigation

Protocols

EVSIP, H.323, SIP, AES, H.235

Codec support

Wideband audio with AAC-LD, G.711
μ-law / A-law, G.722, G.722.1, G.722.1 Annex C

Network

QoS – DiffServ/ToS
Ethernet – Built-in dual port
100/1000Mbps Ethernet switch

Security

Secured and authenticated certificate-based encryption, TLS and HTTPS
Single port requirement for NAT/firewall traversal

Installation

Plug and play with QuickConnect
Automatic speed test
