

VidyoMobile™

Video collaboration on hand-held devices

VidyoMobile™ software brings high-quality video conferencing to popular Android and iOS tablets and smartphones. Now you can host or join a person-to-person or multi-party video conference from wherever you are, using a simple internet connection. As an endpoint in your VidyoConferencing™ system, VidyoMobile delivers transcode-free video conferencing for natural communication at the pace of conversation, without the broken pictures associated with traditional solutions. Enjoy

the freedom to connect and collaborate easily with others across a wide range of endpoints from smartphones to room-based telepresence systems.

Key Features

Unique VidyoMobile Benefits

- Extreme Definition (XD): up to 3 megapixel resolution for shared content
- Customized layout with up to 4 onscreen participants
- Scroll through thumbnails of all participants and content shares and choose which display onscreen
- Make any participant or content share bigger with pinch-to-zoom and real-time panning
- Adaptive Video Layering™ technology optimizes video streams for the capabilities of each user's device and network conditions

Incredible User Experience

- Host and join conferences with participants on any type of endpoint, including desktop and room-based systems
- Ultra-low latency for natural communication without frozen or blocky images
- Single-tap conference initiation
- Tested and certified on smartphones and tablets from more than 30 popular brands. Visit www.vidyo.com/products/vidyomobile for a list of tested devices.

Ease of Deployment

- Full functionality on both WiFi and 4G networks, extending access to remote and mobile participants
- Designed from the ground up for multi-party collaboration
- Automatic NAT and firewall traversal
- Ability to conference with legacy endpoints via VidyoGateway™ or the free VidyoWay™ interconnectivity service for B2B video conferencing

Lower Cost of Ownership

- Leverage devices users already have, over commodity wireless networks
- VidyoMobile software client licenses bundled with every VidyoConferencing solution
- Perpetual floating VidyoLine™ licenses maximize utilization and keep costs down

Specifications

| VidyoMobile™ | |
|---|---|
| Video | |
| Native Video Codec | H.264 Scalable Video Coding (SVC) |
| Video Encoding | Up to 480 x 270 |
| Video Decoding | Up to 720p |
| Cameras | Front and rear integrated cameras |
| Select and change video devices on-the-fly | Yes |
| Pinch-to-zoom participants | Yes (device dependent) |
| # of participants displayed simultaneously | 4 |
| Privacy mode | Yes |
| Audio | |
| Codec | SPEEX Wideband Audio, up to 32 Khz sampling rate |
| Automatic Echo Cancellation | Native to device |
| Headsets | Device dependent |
| Select, change & mute devices on-the-fly | Yes |
| Content Sharing | |
| Share Application or Desktop | No |
| View Shared Content | Yes, up to 3MP |
| Pinch-to-zoom shared content | Yes |
| H.239 data sharing with legacy endpoints via VidyoGateway™ | Receive only |
| Management | |
| User accounts established at the VidyoPortal™ | Yes |
| Global Directory, personal speed-dial list | Yes |
| Presence indication in directory | Yes |
| Participant name display option | Yes |
| On-screen call statistics by participant | Yes (toggle) |
| Call detail records | Yes |
| Client software download | iOS: App Store; Android: Google Play |
| Security | |
| Automatic firewall traversal | Yes |
| STUN and ICE protocols for NAT traversal | Yes |
| SSL and AES-128 bit encryption (with 3rd party certificate) | Yes |
| System Requirements | |
| Supported OS | iOS: 4.3 or higher; Android: 3 or higher |
| Recommended Configuration | Dual-core processor (such as ARM Cortex A9 1 GHz); 512 MB RAM |
| Devices & Accessories | |
| Smartphones and Tablets | For the most current list of supported devices, see http://www.vidyo.com/products/vidyomobile/ |
