SMART Room System™ for Microsoft® Lync®

A more effective way to collaborate using Microsoft Lync

Transform your meetings with the SMART Room System, an integrated hardware solution that combines touch-enabled displays with an HD video camera, microphones and speakers to enable rich audio, video and data collaboration.

Meeting participants can contribute ideas in more creative ways and collaborate in a more inspired way – all within the Microsoft Lync software they already know.

Commercial-grade, touch-enabled flat panel display
A durable, high-definition LCD interactive flat panel that enables an unrivalled touch experience

Video camera
The HD camera displays the entire room, adapts to any lighting condition and gives the feeling of making direct eye contact

Immediate startup
The display uses proximity detection to turn on when you walk into the room. And you can start your meeting by pressing one button.

Optional floor stand
Avoid the need for wall reinforcement and manage table wiring with the integrated raceway

Administrative console
Switch between presenters, change the configuration of data and video and move between presentation and whiteboard content

Microphones and integrated audio
Up to 4 tabletop microphones can be connected, ensuring effective coverage and integrated speakers offer high quality sound.
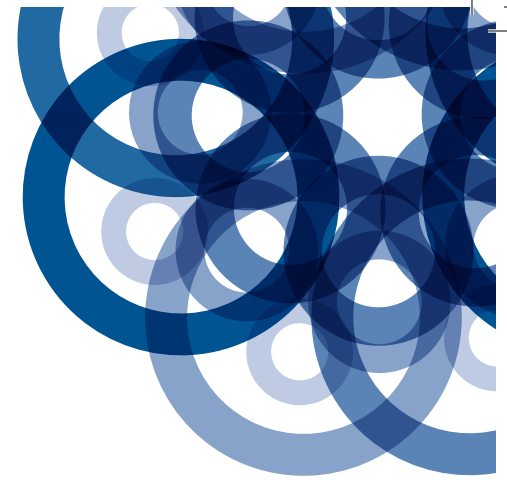

Inspired Collaboration™ | **SMART**
