

The display reimagined

smartkapp.com

The display for the modern world

Imagine an ultra HD display with a built-in whiteboard that enables **multi-way inking between any combination of devices, anywhere in the world** – simultaneously. Sound magical? We thought so too.

Connect using the SMART kapp app

Connect to the display through the SMART kapp® app using a QR code and share the meeting with participants in the room or across the globe for multi-way inking, capturing and saving.

To get started,
download the app

Whiteboard meets display

SMART kapp iQ™ isn't just a whiteboard. It's the world's best Ultra HD enabled display and includes:

- **Multi-way inking** - All remote participants can write on the display in real-time from any device. Different ink colors make ideas come alive and help identify contributions.
- **Display-to-devices** - Connect any Android or iOS device to SMART kapp iQ and you can share and save in real-time to any connected laptop, tablet, smartphone or other SMART kapp iQ displays.

“A 4K display and interactive whiteboard that’s as simple to use as paper and pen.”

David Danto, Director of Emerging Technology
