

CAMPUS

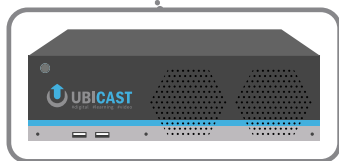

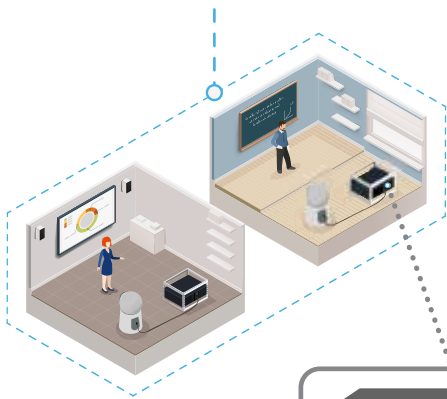

Produce Rich Media videos on a large scale, simply.

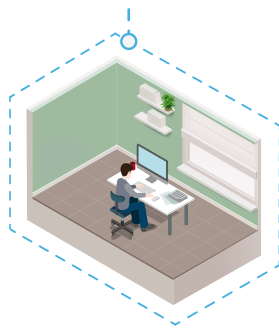

CAPTURE

your presentations automatically. Speaker and slides are both recorded in full quality.

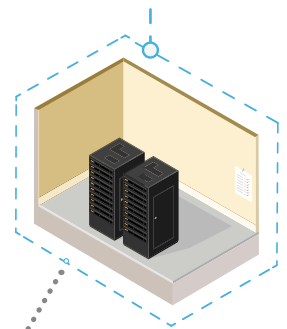

EDIT

your content with a few gestures to trim and customise appearance.

SHARE

your videos on your website, intranet, YouTube channel, USB media or MediaServer...

APPLICATIONS

Automate content creation within your establishment with the Campus, designed for multi-room rollouts.

EDUCATION

- Admins can manage an entire recording fleet from their computer or tablet.
- Offer students access to searchable recordings for catch-up and review.
- Stream lectures from one room to another (local streaming).
- Let teachers focus on their lectures, the Campus takes care of capturing the entire in-room experience.

CORPORATE

- Produce high-quality content across multiple rooms, controlled from a single supervisor.
- Equip your training and communication rooms and offer videos of your key sessions.
- Archive and capitalise on knowledge to share it with new employees.
- Digitise your training to send out pre-training videos and optimise travel time and costs.

Why create your content with the Campus ?

SUPERVISION

Schedule recordings ahead of time, remotely control and supervise your rooms.

AUTOMATED

A single button and the Campus takes over: capture, indexing, format conversion and publishing.

CUSTOMISED

Your content's branding (logo, intro clip, etc.) and production (dynamic transitions) are automated.

A LEARNING EXPERIENCE IN VIDEO

INTERACTIVE

Navigate by keywords, chapters and slides to precise sequences

UNIVERSAL ACCESS

View on any device

FLEXIBLE

View and review courses or training sessions anytime and at your own pace
