

MEDIASERVER

Publish and share your media library on an interactive video portal.

APPLICATIONS

The MediaServer delivers all types of content to your students, clients or collaborators and lets them interact, filter and search. You can share all of your existing videos and those created with the Studio or Campus.

EDUCATION

- Easily feed interactive content into your LMS, relying on a scalable platform to handle your large audiences.
- Let students and faculty staff create videos directly from their PC/Mac.
- Effortlessly manage viewing, editing and collaboration rights for students, teachers and admins.

CORPORATE

- Create your own branded WebTV portal or feed content into your corporate intranet and eLearning platform.
- Deliver interactive and high quality video webinars to your teams, clients and partners.
- Access statistics reports to measure your content's success and better know your audience.

Why share content with the MediaServer ?

FLEXIBLE

The MediaServer is hosted on your network or by UbiCast.

INTERACTIVE

Your audience accesses videos through a uniquely interactive and engaging player.

OPEN

Import existing content, create videos from your own computer and publish to your LMS.

A COLLABORATIVE AND INTERACTIVE EXPERIENCE

COLLABORATIVE ANNOTATIONS

Questions, links, pictures and documents: all indexed in time by your audience

BUILT-IN ACTIVITIES

Polls and multiple choice questions to maintain attention and interact with viewers

ADVANCED NAVIGATION

Navigate by keywords, chapters and slides to precise sequences

TECHNICAL SPECIFICATIONS

FORMATS AND PROTOCOLS

On demand

- Capture audio & screen directly from a web browser
- Upload and transcode any video file to MP4 (h.264/AAC)

Live

- Streaming HTTP (HLS)

DEPLOYMENT METHODS

- Shared (OVH + Amazon Cloud for storage and CDN)
- Dedicated (OVH or your datacenter)
- On your network (physical or virtual servers, we provide solutions to optimise bandwidth and scaling)

The MediaServer is based on Linux (Ubuntu Server 64bits 14.04 LTS)
