EASIER, FASTER AND COST EFFICIENT THAN ANY OTHER SOLUTION

As a leading systems integrator for videoconferencing, media technology and conference room construction, DEKOM offers explicitly for professional use customized enterprise solutions based on commercial, non-proprietary components for any room size. Trust our expertise and turn any location into a professional, powerful work environment that is intuitive and easy to use with our perfectly matched, cost-effective hardware bundles.

Zoom Rooms & Workspaces combines video conferencing, wireless content sharing and integrated audio into a single, fully cloud-based platform that can be deployed in any meeting room with minimal effort.

FLEXIBLE BUILDING BLOCKS FOR ALL ROOMS

As a system house for media and video conferencing technology, DEKOM offers complete solutions for meeting rooms including media furniture, media controls, acoustics and lighting. We adapt the technology to your requirements. Whether you use hardware or software for visual communication is taken into account accordingly. On the following pages we propose the technical implementation of the equipment of ThinkTanks, Huddle Rooms or Conference Rooms based on software videoconferencing clients.

THINKTANK 3 (up to 3 persons)

The ThinkTank 3 provides a retreat for meetings, presentations, and video conferencing, especially for small groups and individuals. The operation of the technical devices is simple and intuitive and possible without long lead time.

THINKTANK 3 MOBILE (up to 3 persons)

The ThinkTank 3 Mobile is also suitable for small group meetings, presentations and videoconferencing, and its mobility allows it to be used flexibly in any room throughout the building.

HUDDLE ROOM 5 (up to 5 persons)

The Huddle Room 5 supports creative work techniques in small teams and provides space for spontaneous meetings and video conferencing. For optimal collaboration on a global level, it also integrates external sites seamlessly into the collaboration.

CONFERENCE ROOM 12 (up to 12 persons)

The conference room focuses on high quality presentations and video conferencing. Higher numbers of participants make higher demands on the technical equipment necessary, as good voice quality and acoustics are particularly important here.

OVERVIEW OF AV TECHNOLOGY

- ① 55" HDR 4K display
(optionally available as a touch display)

- ⑧ Ceiling microphone
with beamforming technology

- ② 65" HDR 4K display
(optionally available as a touch display)
